

INTELLIGENT ANALYTICS SOLUTIONS LLC

CAPABILITY STATEMENT

Woman-Owned Small Business (WOSB) • NCSBE, SPSF, NC HUB (pending) • Raleigh, NC
Core Strengths: Advanced Analytics • Applied AI • Optimization • Program Evaluation •
Technical Benchmarking • AI Strategic Advisory

COMPANY OVERVIEW

Intelligent Analytics Solutions (IAS) is a business management analytics company that provides professional consulting, federal contracting services, and tailored solutions to both federal and commercial entities. IAS was founded in 2024 to empower government agencies and departments, from state to federal levels with innovative analytics and Artificial Intelligent (AI) solutions that transform complex data into actionable insights, driving informed policy decisions, improving outcomes, and ensuring optimal resource allocation.

CORE COMPETENCIES

With a commitment to excellence, IAS partners with clients to navigate their analytical journey, from initial discovery to the deployment of customized solutions that meet their unique needs. The firm's strong capabilities in AI-aligned analytical modeling, optimization, and algorithmic development align with **NAICS 541690** (Scientific & Technical Consulting) and **NAICS 541715** (Applied AI & Algorithm Development).

- Advanced Analytics, Applied AI & Decision Science (541690)
- Data Engineering for Analytics (541690)
- Research & Innovation Support Applied (541715)
- Routing Logic (541690)
- Technical Benchmarking & Procurement Support (541690)
- Program Advisory & Documentation (541611/541618)

DIFFERENTIATORS

- Strong capabilities in AI-aligned analytical modeling, optimization, and algorithmic development
- Vendor-neutral evaluation methods that strengthen procurement integrity
- Reproducible, code-driven workflows that improve auditability and reduce long-term cost
- Clear, executive-ready communication for agency leadership and program managers

PAST PERFORMANCE

- For UL Solutions, developed the S&A UL solution's AI strategy crafting an execution roadmap with a projected multimillion-dollar value.
- For SAS Institute, spearheaded global SAS Marketing Optimization implementations, achieving revenue growth between 85% and 4% across diverse sectors.
- For IBM, developed an Advanced Analytics Framework for Gwinnett County Public Schools (GCPS), identifying at-risk students.
- For H&R Block developed new labor cost forecasting methodology, and tools that increased revenue from 3% to 8%, and raised customer satisfaction by 10%.
- For UPS, developed nationwide Sleeper Scheduling System which improved company revenue by transferring air-service loads from airplanes to trucks.
- For Bayer, engineered a resource planning and forecasting tool for R&D laboratory, enhancing project scheduling efficiency
